# ELON'S MARVIN TOKEN

## BACKGROUND

What everyone might not know about Elon's Marvin Token is how we were born. On October 10th, 2021 Elon Musk mentioned something special about one of his puppies Marvin and that was the spark that lit the fire. Elon's Marvin Token was born a few hours later. Technically, from a stealth launch with 1 BNB in the liquidity pool and a spontaneous community that saw the potential of an amazing project. We've come a long way since then, and have plans on making it all the way to Mars. It's no secret that meme coins like Shiba Inu (\$SHIB) have gotten a lot of press this year due to their popularity and rapid growth. They've also made a lot of their early investors very wealthy. The possibility of making a 49,000,000% gain is a very strong possibility in the crypto meme space, and we see ourselves as a prime candidate for a big run up in the Market. We're Elon Musk's Havanese dog Marvin, and our goal is Mars and beyond.

## INTRODUCTION

Elon's Marvin is a hyper-deflationary meme coin based on one of the beloved pets of the famous billionaire Elon Musk. Marvin is a cute Havanese puppy who's been tweeted about by Elon Musk on more than one occasion. In fact, Marvin receives a lot of attention from Elon. One example, is a Tweet on October 10th, 2021 where Elon Musk tweeted "I love ALW! I couldn't agree more. My dog Marvin is Havanese too, although I'm his emotional support human."

Elon's Marvin Token, was initially launched on the Binance Smart Chain, but has bridged over to the Ethereum Network and is currently operating on both Blockchains. By making ourselves available on two of the largest decentralized networks, Elon's Marvin is attempting to capture market share from the from both, and become one of the leading tokens in the decentralized meme space along with the ranks of Doge Coin, Shiba Inu and Floki.

Our plans expand beyond being a meme token. We are planning on rolling out P2E gaming, a Metaverse, and Defi applications that will set us apart from all the other dogs in the pound.

Along with those plans includes growing our community exponentially, and being organized around a central ecosystem which involves SpaceBalls Token along with others that will serve as a means to keep the community organized and empowered within the crypto space.

One of our main goals is to become an investment that is both rewarding and fun for our community. We aim to spread that excitement around the world as a means to help others grow and develop. Both inside crypto, and outside of our immediate market. We realize that the revolution of cryptocurrency has the potential and opportunity to change the entire world for the better.

## MISSION

Elon's Marvin Token's Mission is to grow and develop our community and token utility. We intend on becoming recognized as fully developed force within the meme, defi and gaming communities. We will continue on our mission until the fruits of our labor are realized through a dominant market capitalization, which includes a significant rise in the price of our token \$MARVIN.

## VISION

Our vision is to be a leading cryptocurrency that works together with our community to change the crypto-market and the world for the better. Education, charity and safe space for traders (both advanced and beginners) on their journey throughout the new and dynamic emerging world market.

## ADVANTAGES TO USERS

ELON'S MARVIN TOKEN started off as a stealth launch after Elon Musk's viral Tweet. The benefits related to this alone are exponential as many in the meme space are well aware of. All one has to do is look to popular tokens such as Doge coin and Floki to see what a connection to such a powerful influencer such as Elon Musk brings to communities. However, this is not our only benefit. After our launch on the Binance Smart Chain in October of 2021, the development team sought to bring utility and fun to the community. Our initial launch with a low, hyper-deflationary supply gives holders the opportunity to experience massive profits from holding and joining our community early. Which everyone having the chance to be here now, is. After our first month, we decided to partner with a highly credible and competent team, Moontography, and bridge our token onto the Ethereum blockchain. Again, we are very early and the potential benefit of growth is exponential.

Our tokenomics also assist in bringing value to holders. We reward holders with a percentage of every transactions. Elon's Marvin also automatically adds liquidity to the liquidity pool with every buy and sell. This is a value added by design that helps to set us apart from a majority of tokens in the meme community.

Next on the list, is the future. We are planning on introducing an NFT market place and a Metaverse to the list of benefits that our holders will enjoy. These utilities are in the works to provide a fun and entertaining place to interact with our community and have a real life use case for our token. Centralized exchanges are also planned. This is important so that individuals not familiar with using Decentralized exchanges can take part in all the fun. At the moment we are a young project, with big plans for the future. All designed to benefit our most important asset...our investors!

# HOW OUR ECOSYSTEM WORKS

Elon's Marvin Token is decentralized in nature, and hyper-deflationary to the core. \$MARVIN operates on the Binance Smart Chain, and Ethereum Network. Automatic liquidity additions, token burns, and reflections from transactions reward holders at every level.

Our users have the opportunity to earn passive income, along with the benefits of financial security and freedom.

Our token functions in 3 separate domains:

1. Reflections
2. Liquidity Addition
3. Burns

**REFLECTION**

**LIQUIDITY**

**BURN**

## BURNING OF TOKENS

Elon's Marvin burns tokens on every transaction that occurs on a decentralized platform. This process occurs by sending tokens to a Wallet that has no access key. Without the private key, these tokens cannot be accessed by anyone, and are taken out of circulation and lost forever. In doing this, we have created a hyper-deflationary token that decreases in supply and raises the price floor of \$MARVIN tokens over time. Similar to Bitcoin's limited supply, but even more scarce. Over the months and years in \$MARVIN's existence, our limited supply will continue to decrease through the burning process. As supply decreases and demand increases, Elon's Marvin's price is set to skyrocket across the cryptosphere

## REFLECTION

We want to present a platform for participants to earn passive income. Along with revolutionizing the meme coin market, there is also a beneficial factor for our users who hold their Elon's Marvin tokens in their personal wallets. 1% of every transaction, buy or sell will automatically be placed into investor's wallets. These automatic reflections are distributed directly into the wallets of Marvin holders. Whether the price of \$MARVIN goes up or down, holders continue to receive rewards. The more you hold, the more you receive. This is also the process by which the burn wallets on both the Ethereum and Binance Blockchains receive tokens that are then removed from the circulating supply. A process that continues to raise the floor price of Elon's Marvin tokens.

## LIQUIDITY

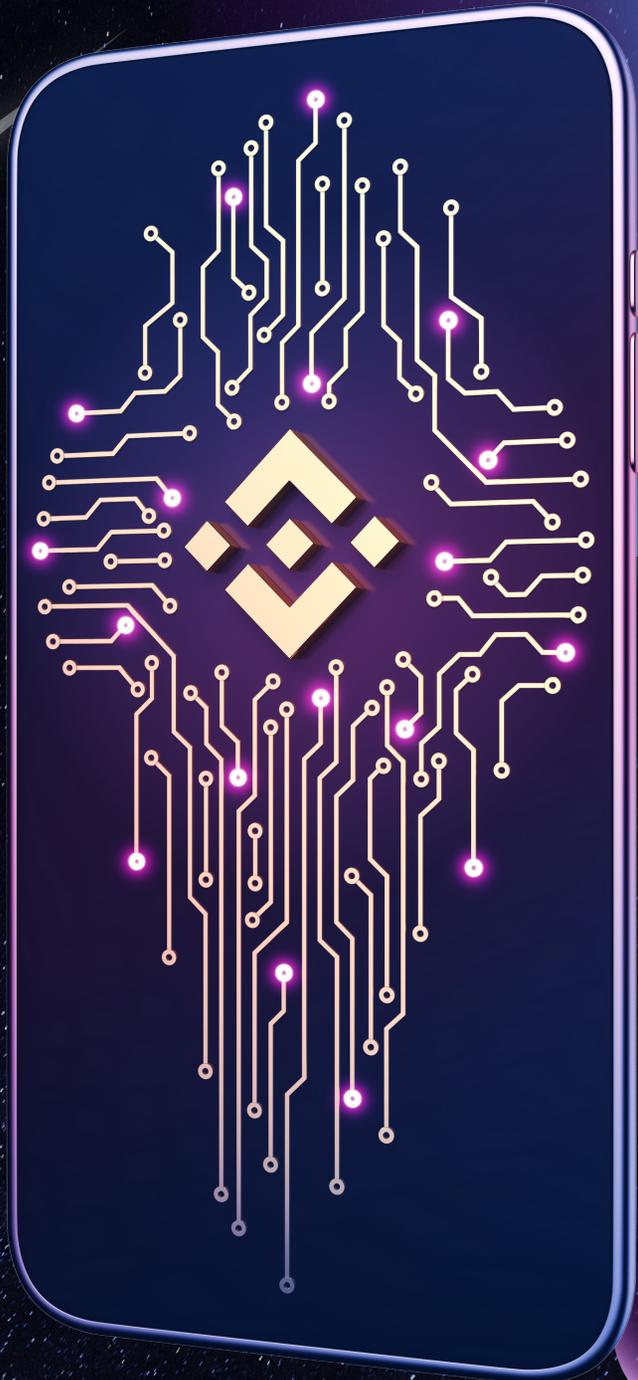

Every transaction of Elon's Marvin contributes towards auto-generating liquidity, which is added to the liquidity pools used by exchanges. Our Platform offers our users the safety of a liquidity-Locked system. \$MARVIN's Liquidity has been locked by delivering liquidity pool (LP) tokens to a Time-locked smart contract relinquishing ownership for a set length of time. Before that time expires, our developers will extend time on the liquidity locks to continue to provide the safety that our investors deserve. Developers cannot recover funds from the liquidity pool unless they own LP Tokens, and during locked periods, the funds can not be removed. This gives investors assurance that the token developers will not run away with the liquidity funds. Locking liquidity is now a standard practice for all token creators, and helps to distinguish a fake currency from legitimate ones.

## OUR BLOCKCHAIN PARTNERS

Binance is a decentralized exchange with a decentralized network of nodes where you may store your private keys and manage your personal wallet. A blockchain ecosystem which includes exchanges, labs, launchpads, & Academic Research. The Platform emphasizes security, stability, and efficiency, attracting both individual and intuitional traders. It provides a peer-to-peer distributed system built by Binance and its community. It is a secure, native marketplace that allows users to trade digital assets both issued and published on it. All transactions are recorded on-chain, providing a comprehensive, fully transparent activity record.

## ETHEREUM BASED PLATFORM

Fabian Vogelsteller & Vitalik Buterin proposed the ERC-20 standard. A standard which offers an API for tokens within smart contracts. The measure includes transferring tokens from one account to another, obtaining an account's current token balance, and obtaining the network's total token supply. ERC-20 Token Contracts are smart contracts that appropriately implement ERC-20 operations and help maintain track of the produce tokens on the Ethereum Blockchain. ERC-20 tokens have been used to start a massive amount of cryptocurrencies that have been distributed through initial coin offerings and made available for trading across hundreds of decentralized centralized exchanges. The wide use of ERC-20 tokens brings an added value to Elon's Marvin and its holders.

## WHAT'S SPECIAL ABOUT US?

If you're concerned about the adverse environmental effects of cryptocurrency mining. Don't worry Elon's Marvin is not be mined. Elon's Marvin was envisioned as a lighthearted, playful cryptocurrency that would appeal to individuals who missed out on Bitcoin, Doge Coin, Shiba Inu & the crypto gold rush. So here is your chance to believe and invest in \$MARVIN, a cute Havanese puppy. We're inviting you to have faith in Elon Musk's Marvin, because our primary goal is to become best friends with our brother Floki Inu, who's just a little more popular than me now. But soon it will be our turn, and I can't wait to show you the proof!

The price of \$MARVIN has soared from \$0.001 to over \$0.65 since we launched, as early investors turned bullish on our token. We have every intention on soring past \$1 and into the hundreds of dollars before we're done. We're Elon's Marvin – inspired by Elon Musk's lesser-known (for now), real-life Havanese dog Marvin.

Prospective acquirors of \$MARVIN should carefully consider and evaluate all risks and uncertainties (including financial and legal risks and uncertainties) associated with the distribution of \$MARVIN, the Company, the Distributor and the Elon's Marvin Token team.

\$MARVIN Token: \$MARVIN are designed to be utilised, and that is the goal of the \$MARVIN distribution. In fact, the project to develop Elon's Marvin would fail if all \$MARVIN holders simply held onto their \$MARVIN and did nothing with it. In particular, it is highlighted that \$MARVIN:

1. does not have any tangible or physical manifestation, and does not have any intrinsic value (nor does any person make any representation or give any commitment as to its value);

2.

is non-refundable and cannot be exchanged for cash (or its equivalent value in any other digital asset) or any payment obligation by the Company, the Distributor or any of their respective affiliates;

3.

does not represent or confer on the token holder any right of any form with respect to the Company, the Distributor (or any of their respective affiliates), or its revenues or assets, including without limitation any right to receive future dividends, revenue, shares, ownership right or stake, share or security, any voting, distribution, redemption, liquidation, proprietary (including all forms of intellectual property or licence rights), right to receive accounts, financial statements or other financial data, the right to requisition or participate in shareholder meetings, the right to nominate a director, or other financial or legal rights or equivalent rights, or intellectual property rights or any other form of participation in or relating to Elon's Marvin Token, the Company, the Distributor and/or their service providers;

4.

is not intended to represent any rights under a contract for differences or under any other contract the purpose or pretended purpose of which is to secure a profit or avoid a loss;

5.

is not intended to be a representation of money (including electronic money), security, commodity, bond, debt instrument, unit in a collective investment scheme or any other kind of financial instrument or investment;

6.

is not a loan to the Company, the Distributor or any of their respective affiliates, is not intended to represent a debt owed by the Company, the Distributor or any of their respective affiliates, and there is no expectation of profit; and

7.

does not provide the token holder with any ownership or other interest in the Company, the Distributor or any of their respective affiliates.

Notwithstanding the \$MARVIN distribution, users have no economic or legal right over or beneficial interest in the assets of the Company, the Distributor, or any of their affiliates after the token distribution.

To the extent a secondary market or exchange for trading \$MARVIN does develop, it would be run and operated wholly independently of the Company, the Distributor, the distribution of \$MARVIN and Elon's Marvin Token. Neither the Company nor the Distributor will create such secondary markets nor will either entity act as an exchange for \$MARVIN.

Informational purposes only: The information set out herein is only conceptual, and describes the future development goals for Elon's Marvin Token to be developed.
